

## NORIT AT AQUATECH 2011 IN AMSTERDAM NOVEMBER 1-4

*See Norit's Innovations for Potable and Wastewater Purification at Hall 7, Stand 07.530*

October 31, 2011 Amersfoort, The Netherlands – Norit Activated Carbon, world's largest and most experienced producer of activated carbon, will be showing its activated carbon solutions for water purification at Aquatech, world's leading trade exhibition for process, drinking and waste water.

The exhibition takes place November 1-4 in Amsterdam, the Netherlands. The Norit booth will feature several innovations for potable and wastewater purification and for Sewage Air and Biogas purification.

### **H<sub>2</sub>S removal with Norit RST - Sewage Air and Biogas purification**

In sewage operations several sources of odors are recognized. Sewage tunnels, transmission lines where pumping stations are installed and sewage treatment plants have many operations generating odors. Norit Activated Carbon offers a solution to remove these odors with Norit RST - an innovative water regenerable carbon grade made of renewable material with unique catalytic properties without the presence of an impregnant.

### **1-STEP® - Towards WFD quality with one post-treatment step**

Activated carbon plays a key role in helping customers to meet the 5<sup>th</sup> Water Frame Work Directive. Extensive studies and laboratory tests have resulted in the development of innovative carbon solutions such as the 1-STEP® Filtration Technology.

The water and wastewater challenges we face today are of global proportions. The Norit Activated Carbon team is ready to present our latest purification solutions and to discuss how we can help our customers optimize their process performance and reduce their footprint.

We look forward to meet you at AQUATECH AMSTERDAM - Hall 7 - Stand no. 07.530.

### **About Norit**

Founded in 1918, Norit is the world's largest and most experienced producer of activated carbon which is used to remove pollutants, contaminants and other impurities from water, air, food and beverages, pharmaceutical products and other liquids and gases in an efficient and cost-effective manner.

Norit's history of innovation in purification allows us to develop the right product solution to meet each customer's needs. We have created more than 150 different grades of activated carbon – produced from a variety of raw materials – so that our customers get precise solutions that fit their applications and work better than an “off the shelf” product. In addition to our unparalleled product portfolio, Norit offers a full range of activated carbon services including system design, carbon reactivation, bulk delivery and change-out, carbon evaluation, as well as technical service and support to help our customers cost effectively meet their specific purification needs.

Norit has facilities in seven countries, and a network of sales and service centers, business partners, and distributors serving customers in more than 100 countries around the world. For more information, please visit us at [www.norit.com](http://www.norit.com).
